Intro

Ordinals Flamenco NFTs Collection is pleased to release its white paper, outlining the goals for this project as it moves forward into the future.

Ordinals Flamenco NFTs Collection is a new NFT project created using Bitcoin Ordinals platform. The inscriptions are originated on march 2023 as exclusive 13 items on the First Collection.

The vision of Ordinals Flamenco aims to enrich Metaverse experience by preserving the World Cultural Diversity over time, not only restricted to collectible artwork, Ordinals Flamenco aspires to promote virtual multiculturalism and welcomes those who want to support this future vision!

Vision

Ordinals Flamenco aspires to evolve from simply a collectible NFT project into a unique metaverse space. The vision for this metaverse space is to be the new space for performing arts. A virtual diverse and

creative world of music and video arts. This metaverse space will be called **NFT Media Awards (NMA)**.

We aim to accomplish this goal starting with the development of the Ordinals Flamenco community and the eventual launch of a decentralized autonomous organization (DAO). The purpose of the DAO will be to determine the future development and governance of **NFT Media Awards (NMA)** and the booking of artists, performers and fans which are to use the space.

Voting weight for members within the DAO may in the future be distributed through the use of a token called **NMAS**. The development and distribution of this token remains to be determined. The Ordinals Flamenco community will be responsible for the development of a DAO charter which will outline roles and responsibilities of the organization.

NFT Media Awards (NMA) aims to recreate the traditional music and cinema awards experience. This includes NFT ticket stubs for patrons to use and save as mementos of the experience and aims to work with artists academies to create and distribute custom NFT merch to vote and commemorate each contest.

We have a lofty goal to reach the end state of this vision and will require the Ordinals Flamenco community to come together to help move this project to finish line.

The Ordinals Flamenco Community

Our goal is to build out the initial Ordinals Flamenco community through the development of a discord community channel. Membership to the Ordinals Flamenco community discord will initially be restricted to holders of the Firsts and upcoming Ordinals Flamenco nfts. Firsts Ordinals Flamenco will be unique NFTs available on the markets and give access to an upcoming whitelist.

Current holders of any Ordinals Flamenco NFTs will automatically be added to the whitelist. A to be determined number of available spaces will remain on the whitelist for new, would be, community members. Through the development of the Ordinals Flamenco community we will need to build a development team to work together to build this project out to completion.

Ordinals Flamenco White List

The entire premise of Ordinals Flamenco is that we all are a unique part of this World and Culture is form by all our contributions. This is what Ordinals Flamenco wants to represent by positioning microcultures on the new scenarios. Join the Project so we create this new World together!

Disclaimer

The entire future state of this project is contingent on the development of the Ordinals Flamenco community, the development of the relevant technology and any upcoming regulations in regards to the administration of decentralized autonomous organizations. We will be compliant with any future regulations regarding the administration of a decentralized autonomous organization. There is no guarantee of any future value or utility of any Ordinals Flamenco NFTs. Ordinals Flamenco NFTs Collection remain a collectible NFT artwork.
